Assessment Brief

Student Name/ID Number/Section	
HTU Course Number and Title	Entrepreneurship Bootcamp
BTEC Course Number and Title	
Academic Year	2025-2024
Assignment Author	HTU - Social and Basic Sciences Department
Unit Tutor	Dr. Wedad Alsaad Ms. Hala Abu Rbeiha Ms. Goretti Arnaste Ms. Asma' Al Kayalli Ms. Layan Quba
Assignment Title	Entrepreneur's Challenge: From Problem Identification to Investor Pitch
Assignment Ref No.	
Issue Date	
Formative Assessment Dates:	
Submission Date	
IV Name & Date	Ms. Sawsan Al Sayeh

Submission Format

This assignment consists of four parts that must be completed and submitted according to the following guidelines:

Guidelines

1. Only soft-copy submissions are allowed. You are required to upload your submission files to Microsoft Teams and to university's eLearning system at <https://elearning.htu.edu.jo/>.
2. The submission should be a completed individual portfolio folder including the tasks outlined in the assignment brief. This assignment involves group work, but each student should submit an individual portfolio folder.
3. Please check for viruses before uploading your files.
4. Email and late submissions will not be accepted.
5. HTU policies and regulations will be applied to any kind of plagiarism.
6. The in-class oral assessment will consist of one-on-one oral discussion between you and your instructors.
7. Attending the oral assessment is mandatory on the date and time set by your instructor.
8. All tasks covered in the submissions will be evaluated through an oral assessment. Therefore, failing to answer any question in the oral assessment that pertains to specific criteria will result in a failure of that criteria, even if it was covered in the report.
9. You must sign the declaration form attached to this assignment and submit it as a separate Word Document. Failure to submit the declaration form will result in your assignment not being accepted.
10. Failure to follow these guidelines may result in an 'unclassified' grade.

Unit Learning Outcomes

- LO1:** Demonstrate the knowledge of entrepreneurship mindset and application of a range of entrepreneurial skills and approaches to launch a start-up.
- LO2:** Demonstrate effective application of design thinking techniques to identify challenges, propose innovative business solutions, and create prototypes.
- LO3:** Demonstrate effective application of marketing and financial fundamentals to develop a brief marketing strategy and manage a feasible and viable start-up.
- LO4:** Demonstrate the essential skills needed to craft a start-up business model and effectively pitch a business idea to potential investors.

Assignment Brief and Guidance

Scenario: The Real-World Startup Challenge – Spotting the Gap, Pitching the Future

You are an aspiring entrepreneur preparing to launch your own business. Instead of starting with a fixed idea, your journey begins with spotting a real gap in the market—an unmet customer need, an inefficiency, or a new opportunity shaped by emerging trends.

Your task is to research, validate, and develop an innovative business concept that addresses this gap. The idea must be feasible, scalable, and grounded in real-world evidence, demonstrating both creativity and practicality.

The challenge concludes with a professional investor pitch where you present your concept, value proposition, target market, business model, and potential for growth and impact.

This is a hands-on entrepreneurial experience—you'll think like a founder, research like a strategist, and pitch like a professional.

Assignment Part One (LO1&2)

- Describe how you and your team are developing an entrepreneurial mindset—for example, a growth mindset or agile thinking—while exploring problems and opportunities in the market. Explain why this mindset is important for understanding users, identifying opportunities, and shaping ideas into viable, human-centered solutions.
- Also, identify the key entrepreneurial skills you are practicing (e.g., creativity, empathy, communication, problem-solving) and explain how these skills complement one another as you progress toward defining your project idea.
- Analyze the Political, Economic, Social, and Technological (PEST) environment in Jordan and discuss how each factor shapes people's needs, behaviors, and challenges. Use real examples and evidence from your research to explain how these external factors might reveal opportunities for innovation or problem-solving.

- Compare different types of entrepreneurship (e.g., commercial vs. social, traditional vs. technological) and explain which approach—or combination of approaches—best aligns with the kind of impact or value your team aims to create. Justify your reasoning using your team’s goals, target users, and available resources.
- Prepare a SWOT analysis that integrates your learning so far:
 - **Strengths:** internal advantages such as creativity, collaboration, or research ability.
 - **Weaknesses:** internal challenges such as limited experience, resources, or time.
 - **Opportunities:** external trends or unmet needs that could inspire a viable project.
 - **Threats:** external barriers such as competition, regulations, or shifting user priorities.
- Conduct research to identify a real and meaningful challenge faced by your target users that will form the foundation of your business idea. Describe your data collection methods (e.g., interviews, surveys, or observations) and how you analyzed user needs, pain points, and experiences. Present both your initial and refined challenge statements and explain how feedback from research guided your refinement process and your understanding of the problem.
- Provide a clear description of your target market segment, outlining key demographic and behavioral characteristics, and explain why this segment is relevant and directly connected to your identified challenge. Then, develop a detailed user persona that represents your target audience. Include information such as demographics, specific needs, motivations, behaviors, and main pain points that your proposed business will aim to address.
- Present your proposed business solution and explain how it directly addresses the core needs and problems identified during your research. Discuss why this solution is realistic and valuable for your target market.
- Develop a clear value proposition that explains the unique benefits your product or service offers to your target audience and why they should choose it over existing alternatives.
- Present the initial version of your prototype, highlighting its main features and benefits. Explain how your prototype responds to user needs and ensures ease of use for your intended audience.
- Design a testing plan for your business solution and prototype. Outline the testing steps, target users, feedback tools (e.g., surveys, interviews), and success metrics you will use to evaluate performance and gather insights for further improvement.

Assignment Part Two (Cont. LO2 & LO3)

- Execute your testing plan and explain how the testing was carried out. Summarize the key feedback received from users or stakeholders. Describe how you used this feedback to refine your solution and improve your prototype.

- Assess the effectiveness of your testing and feedback process. Discuss whether the feedback you received was useful and reliable, and whether your success measures accurately indicated how well the prototype worked. Reflect on what aspects of your testing process were successful and what you would change or improve in future iterations.
- Define and quantify your Total Addressable Market (TAM), Serviceable Available Market (SAM), and Serviceable Obtainable Market (SOM). Provide a clear overview of your product's or service's total market potential, showing its reach, scale, and growth opportunities.
- Conduct an analysis of both direct and indirect competitors in your target market:
 - Develop a benchmarking table comparing competitors across key dimensions such as price, quality, target segment, features, distribution channels, and value proposition.
 - Identify your unique selling points (USPs) and explain how they create added value for customers.
 - Create a positioning chart (e.g., price vs. quality or innovation vs. convenience) to visually show where your product or service stands in comparison to competitors.
 - Based on this analysis, explain how your product or service is positioned in the market.
- Describe your marketing strategy using the four Ps:
 - **Product:** Outline the main features, benefits, and value your product or service offers to customers.
 - **Price:** Explain your chosen pricing strategy (e.g., penetration, skimming, or competitive pricing) and justify why it suits your product and target market.
 - **Place:** Describe how your product or service will be distributed and made accessible to your target customers.
 - **Promotion:** Identify the promotional channels and tactics you will use to build awareness, attract customers, and drive engagement.
- Identify your expected business costs and revenues using realistic assumptions. Classify your costs as startup vs. operational and fixed vs. variable to clarify your financial structure.
- Develop a detailed and realistic startup budget that includes estimated costs for key business areas such as production, marketing, operations, staffing, and other relevant expenses.
- Clearly explain how your business will generate income. Describe your revenue streams and model to show how your startup will sustain profitability.
- Perform a break-even analysis using both a graphical and a numerical calculation. Identify and present the point at which total revenues equal total costs, indicating when your business is expected to become profitable.

- Prepare a projected income statement showing your expected revenues, costs, and profits over a defined period (e.g., 12 months). This should provide a clear picture of your startup's financial performance and growth potential.
- Evaluate the overall financial viability of your business using the projected financial data. Calculate key financial ratios such as profit margin and return on investment (ROI) to assess the sustainability and long-term growth potential of your business model.

Assignment Part Three (Cont. LO2 and LO4)

- Present a complete Business Model Canvas. Provide a clear explanation of each component in your Business Model Canvas. Describe how these elements are interconnected and how they collectively support the coherence, feasibility, and strategic direction of your business.
- Critically assess each component of your Business Model Canvas. Highlight strengths and identify areas for improvement. Suggest specific enhancements to improve the feasibility, desirability, and viability of your business model.
- Present your final prototype, highlighting its core functionalities. Explain how it evolved from earlier versions and demonstrate how it effectively addresses the initial challenge and meets the needs of your target users.
- Create and deliver a compelling pitch presentation for your business idea. Your pitch should include a clear summary of the problem, your solution, the target market, business model, financial highlights, and a prototype demonstration. Emphasize why your business is a strong investment opportunity.
- Explain how you used your presentation and persuasion skills to clearly pitch your business to potential investors.

Submission Format

Part One:

Hand-in Date: **Tuesday 02/12/2025**

Comprehensive report including all tasks completed to date.

Presentation summarizing your responses.

Testing plan outlining your approach to prototype testing.

Initial prototype demonstrating the early concept.

All work must be supported with evidence. Research findings should be included in the report appendix, and proper referencing must be used throughout, following the Harvard referencing style. Evidence of

collaboration, such as shared planning, task division, and group reflections, should be clearly documented in the report

Part Two:

Hand-in Date: **Monday 12/01/2026**

Financial and market analysis report including all relevant tasks completed to date.

Brief report summarizing prototype testing and refinement process.

All work must be supported with evidence. Research findings should be included in the report appendix, and proper referencing must be used throughout, following the Harvard referencing style. Evidence of collaboration, such as shared planning, task division, and group reflections, should be clearly documented in the report.

Part Three:

Hand-in Date: **Monday 19/01/2026**

Complete and critically analyzed Business Model Canvas.

Final refined prototype with documented functionality and improvements.

Compelling pitch presentation showcasing your business idea, prototype, and financial outlook.

Table describing how you use presentation and persuasion skills to deliver a compelling pitch.

All work must be supported with evidence. Research findings should be included in the report appendix, and proper referencing must be used throughout, following the Harvard referencing style. Evidence of collaboration, such as shared planning, task division, and group reflections, should be clearly documented in the report.

Note: A full report combining all three parts should be submitted on Thursday 22/01/2026.

Assessment Criteria

Pass	Merit	Distinction
LO1 Demonstrate the knowledge and application of a range of entrepreneurial skills and approaches to launch a start-up.		
P1 Demonstrate understanding of several entrepreneurial skills needed to launch a start-up. P2 Demonstrate knowledge and understanding of various entrepreneurship approaches.	M1 Justify the most suitable entrepreneurship approach based on the market conditions, resources, and goals.	D1 Evaluate the importance of application of entrepreneurial skills in pursuing an entrepreneurial opportunity.
LO2 Demonstrate effective application of design thinking techniques to identify challenges, propose innovative business solutions, and create prototypes.		
P3 Demonstrate the use of design-thinking techniques to identify market gaps and challenges. P4 Demonstrate the use of design-thinking techniques to propose a business solution.	M2 Design and develop several prototype iterations based on potential customer feedback.	D2 Evaluate the effectiveness of the business solution validation and prototype testing processes.
LO3 Demonstrate effective application of marketing and financial fundamentals to develop a brief marketing strategy and manage a feasible and viable start-up.		
P5 Demonstrate effective application of marketing fundamentals to analyze market components. P6 Demonstrate effective application of marketing fundamentals to position a business idea. P7 Demonstrate effective application of financial fundamentals to create financial projections.	M3 Discuss marketing mix components and create a brief marketing strategy. M4 Create and describe the components of forecasted financial statements.	D3 Evaluate the viability of a start-up business using appropriate financial ratios.
LO4 Demonstrate the essential skills needed to craft a start-up business model and effectively pitch a business idea to potential investors.		
P8 Demonstrate the essential skills needed to craft and describe a start-up business model canvas. P9 Demonstrate effective presentation and persuasion skills needed to clearly pitch a business idea.	M5 Create a compelling pitch that proposes a business idea to potential investors.	D4 Evaluate critically the components of a business model canvas and suggest possible improvements to enhance business desirability, feasibility, and viability.
